Asset Class Returns

Source: Morningstar Direct. As of September 30, 2024. *Hedge fund returns as of August 31, 2024.

Fixed Income (3Q 2024)

- + The Federal Reserve cut its target rate by 50 basis points at its September meeting, as the inflation backdrop has progressed closer to the Fed's target and the labor market has started to show signs of weakness. Longer duration assets, the most sensitive to lower interest rates, performed best in the quarter.
- + The high yield market continues to generate strong returns as investor expectations grow for the prospect of a soft-landing scenario.
- + The U.S. dollar fell during the period, providing an added tailwind for non-USD debt.

Equity (3Q 2024)

- + Areas of the equity market less exposed to the concentrated names in U.S. large cap outperformed in the third quarter. U.S. small cap had a strong return, benefitting from both lower interest rates and less exposure to concerns about the monetization of Al.
- + Central bank activity in Europe also provided a boost to international developed markets.
- + Emerging markets outperformed developed markets during the period. Investor optimism surrounding the recent stimulus package in China helped fuel strong performance for the region.

Real Asset / Alternatives (3Q 2024)

- + Equity REITs had a strong quarter, producing double digit results and bringing the asset class into positive territory year-to-date. The falling interest rate environment and market expectations for the Fed to continue to cut interest rates fueled the asset class.
- + Commodities eked out a modest gain, driven from the metals sub-sectors. Energy lagged due to declining oil prices – a rare move amidst rising military tensions in the middle east.
- + Real assets performed well during the quarter. Much of the gain came from infrastructure and timber.
